

WEEKLY STATUS REPORT

DATE: 1/17/16 – 1/23/16

What I did this week:

- Read through last year's capstone report and took notes in engineering logbook
- Created the Github repository
- Developed and presented PowerPoint of proposal to graduate students and advisor to obtain help with issues
- Completed weekly status report
- Met with team at Aram's house
 - Determined best times to meet
 - Discussed issues that need to be resolved
 - Will need to invest in an oscilloscope to track current spikes

Any issues I encountered:

- Determining area of code that needs to be fixed

What I will be working on next:

- Research GTK+ and begin getting familiar with building a GUI using this program
- Work on project design specifications and project timeline

Notes:
